Documentation Required:
FIRE, EMS, or Equivalent Instructor I

An Intensive "Train the Instructor" Program for Emergency Vehicle Operations"

**Audience: Training Officers, Company Officers,
Fire and EMS Service Instructors**

This course is designed to teach the necessary instructional methodology to potential and existing instructors in order to successfully deliver the following program.

The operator of emergency vehicles in today's society carries a heavy responsibility. The penalty for not adequately training your operators also carries legal consequences. Emergency vehicle operators and the entities they represent have been held both criminally and civilly responsible for their actions.

This program was developed to teach the emergency vehicle operator (EVO) proper driving technique, the mental as well as the physical aspects of the driving task. The program points out the long-term impact of an accident involving an emergency vehicle on the operator, the emergency service organization and the community in which they serve.

Instructor: As an instructor, participants are provided with the knowledge and tools to deliver the student-level course. An instructor's guide, the PowerPoint program, and instructor resources are provided. This course focuses on Instructor methodology and program delivery.

Program includes:

1. Identifying the problems in emergency vehicle operations
2. Motivating the emergency vehicle operator to perform professionally
3. Legal aspects of Emergency Vehicle Operations
4. Vehicle components and technology
5. Physical forces acting upon the vehicle
6. Performing vehicle inspection and maintenance
7. Legal and regulatory requirements of SOGs
8. Emergency vehicle Safe Operating Practices
9. The Emergency Vehicle Operations "hands-on" driving course

Upon completion, the participant will be able to:

- Effectively deliver this program to other EVOs, prepare schedules, deliver content and supervise and evaluate "hands-on" practice, and determine the effectiveness of the EVDT program.
- Gain a new appreciation of the responsibilities of an EVO
- Effectively describe the civil, criminal and punitive aspects of emergency vehicle operation
- Demonstrate knowledge of and convey to students their state's emergency vehicle statute
- Describe the physical laws and operational characteristics of a moving emergency vehicle
- Describe the personal, ethical, and professional responsibilities as an EVO
